

360° SCREENS™

This unique projection screen produces a perfectly viewable image on both sides at the same time with 180° angle of visibility, creating the world's first 360° projection surface. 360° is another high gain screen material, which still performs well in areas where there is high ambient light. This screen material can either be used as a front or rear projection solution offering increased flexibility for those difficult installs. The 360° is available as a standard film or self adhesive film material cut to size off the roll or in 3 other standard formats:

- Rigid acrylic screen (40", 50", 60", 80", 100", 120")
- Manual poster system (40", 50", 60", 80", 100", 120")
- Electric roll-up screen with RF remote control (60", 80", 100", 120")

FEATURES

- » High gain - 5.7
- » Colour - off white
- » Thickness - 120 micron
