

LCD MEDIA ADVERTISING PANELS

Pro Display's new custom built LCD Advertising Panels are the ideal promotional solution for any business in need of maximising their product / services market potential. This wall-mountable designer advertising panel is available in a variety of screen sizes in both landscape and portrait format. Custom graphics are applied to the acrylic fascia and the screen is mounted using satin silver wall studs. The screen offers a built-in compact flash media player supporting JPEG, MP3 and MPEG 1, 2 and 4 media formats which can be easily updated via a USB port. Other features include speakers in the base, IR remote control and motion sensor. An open chassis version is also available for integration into shop displays, furniture, walls and cabinets.
