

# SUN READABLE TOUCH SCREEN MONITORS

SUN  
READABLE

THRU-GLASS  
TOUCH

WINDOW  
APPLICATIONS

Pro Display has launched a complete range of high brightness LCD touch screen monitors for both window and outdoor applications. These sun readable monitors incorporate a thru glass (projected capacitance) touch screen overlay which operates through glass/windows up to 20mm thick. The rugged widescreen monitors are available in four standard screen sizes – 22", 32", 42" and 46" diagonal (16:9), which are suitable for both store window touch screen displays and outdoor kiosks (optional IP65). This optically bonded LCD technology offers faster response times and greater stability than other thru glass touch screen monitors currently available. Our upgraded software and driver with USB connection have been digitally approved by Microsoft (Windows 2000 / XP compatible).

## FEATURES

- » LCD touchscreen monitors
- » Sun readable screen technology
- » Thru glass touch screen
- » Works on glass up to 20mm thick
- » Long lamp life - 1000+ cd/m2
- » High resolution / contrast
- » VGA, DVI, CVBS, S-Video, Audio

## BENEFITS

- » High brightness display
- » Window / outdoor applications
- » Screen sizes - 22", 32", 42" & 46"
- » IP65 waterproof (optional)
- » Wide viewing angle (16:9 aspect)
- » LVDS / fast response time
- » Works in direct sunlight

## APPLICATIONS

- » Store window displays
- » Indoor / outdoor kiosks
- » Glass partitions / office windows
- » Exhibitions / conferences
- » Visitor attractions / museums
- » POP / POS displays
- » Counters / display stands

## ACCESSORIES

- » Portable stand
- » Window display stand
- » Soundpods
